CODEKENZ / SERVICE SAMPLE

Test one native macOS app workflow

Native AppKit sample · Apple silicon Mac

The saved document reopened in a fresh Mac app process.

Check	Expected	Observed
Open and edit	Open the sample and change the title	Loaded three entries and edited the title.
Cancel	Close Save As while keeping the original	Canceled save produced no copy. The original hash matched.
Save and reopen	Save a copy and reopen after relaunch	Saved JSON reopened with the new title and three entries.

Client deliverable

Mac test cases, app evidence and a clear results report.

Package scope

Test one agreed workflow in a native macOS app on an Apple silicon Mac. A typical scope is opening, editing, saving and reopening one document.
