CODEKENZ / SERVICE SAMPLE

Fix one Xcode Debug build error

One SwiftUI target · Debug · iOS Simulator

A one-line fix restored the Debug build.

Check	Expected	Observed
Before	Reproduce the same build error	Exit 65. Swift rejected a string assigned to a Bool.
After	Run the same build with fresh build data	Exit 0. Build succeeded and produced the Simulator app.
Patch replay	Apply only the scoped source edit	Replayed patch matched the fixed source snapshot.

Client deliverable

Patch and verified before-and-after build evidence.

Package scope

Reproduce one Debug build failure in one Xcode target for iOS Simulator, apply a focused fix and verify the same build again.
